Company executive:	Ing. Jiří Svoboda, CSc., Ing. Jiří Bartoň
Scope of business:	Transport telematics, transport technologies, customised technologies
Address:	Třídvořská 1402, 280 02 Kolín V, Czech Republic
Contact:	tel.: +420 321 759 080, fax: +420 321 759 085
URL:	<a href="http://ddt.spel.cz">http://ddt.spel.cz</a>

The company SPEL or its Transport Technologies Division has been an active supplier in the field of transport telematics since 1996. The first big application was the supply of a motorway information system (DIS) for the D5 motorway from Plzeň to Rozvadov. It Was an extensive control information system with variable traffic signs linked to a meteorological system and a traffic monitoring system, which was at that time the only system built in the Czech Republic. Since then, the DIS system has integrated services related to emergency SOS calls, meteorological information, information on density and type of traffic loads, systems of public lighting regulation, electronic security of motorway objects newly called DIS SOS. This system was successfully applied to the whole D8 (with tunnel control application) and D11 motorways, to a section of the D5 motorway, newly opened sections of the D1 motorway, Prague road ring, high-speed roads R35, R48, I/55 and a vast implementation is in preparation on the D47 motorway.
